MONTHLY REPORT

25X1

PAR 214

30 Sept 65

SUBJECT: Roller Transport Processor (12-Inch)

TASK/PROBLEM

1. Design and fabricate a versatile self-threading photographic processor capable of handling both cut sheet and continuous webs of photographic material and adaptable to a process yielding either standard negative or reversal images. Interchange between processes to be accomplished with a minimum of effort.

DISCUSSION

2. The Roller Transport Processor (12-Inch) has been installed and checked out at the customer's facility under PAR 238. Preparation of an operation manual, which will also serve as the final report, is in progress.

PLANNED ACTIVITY

3. Publish the Operation Manual.

Declass Review by NGA.
